

RADIOLOGICAL STATEMENT

We, at Cambridge Commodities Ltd, hereby confirm that none of the materials we purchase come from areas that have had a nuclear disaster and as such the materials we sell have not come into contact with radioactive materials released during reactor meltdown. Our materials are radioactive contamination free.

Moreover, hereby we confirm that we do not purchase materials from Japan, however, if we did it wouldn't be possible to import them without meeting strict government requirements which are implemented following a nuclear disaster such as the Fukushima incident.

Our products conform with Council Regulation (Euratom) 2016/52 of 15 January 2016 laying down maximum permitted levels of radioactive contamination of food and feed following a nuclear accident or any other case of radiological emergency, and repealing Regulation (Euratom) No 3954/87 and Commission Regulations (Euratom) No 944/89 and (Euratom) No 770/90.

We confirm that the information above is sourced from the original manufacturers/suppliers Specification.

To be used as per local legislation.
