

WADA Statement

Cambridge Commodities (CC) are an Informed Manufacturer certified site and do not handle prohibited products on site except where they are contained in very small quantities within natural products. Controls are in place on site to prevent cross contamination and holding these materials does not affect our Informed Manufacturer site status as they are segregated appropriately during handling and use. All 'Informed Sport' finished products that could be consumed by drug tested athletes must be tested to show that no prohibited substances are detected before being sold to the consumer. A very detailed risk assessment is carried out for all products, which includes whether suppliers supply/handle materials that contain prohormones/stimulants/substances that appear on the WADA prohibited list. As part of the risk assessment, it may be necessary to also conduct an onsite audit. Please note that this is not a 100% guarantee, and all finished products must be tested before they can be sold under the Informed Sports program.

CC is subject to annual audits from LGC, the proprietor of the Informed Manufacturer programme. During these audits the active and upcoming versions of the WADA prohibited list are reviewed and compared against CC's product range and activities to ensure this statement remains accurate. The prohibited list may be viewed here: <https://www.wada-ama.org/en/prohibited-list>

Change History

Version	Change	Customer Notification required Yes / No
1	First Issue	N/A
2	Changed from free from to does not contain	No
